

The Yukon is a land of stunning scenery, diverse ecosystems, and truly remarkable wilderness. This extraordinary natural world is home to some unique communities of birds. This checklist summarizes the occurrence and breeding status of 325 species which have been documented in the Yukon. Breeding has been confirmed for 194 species, and 43 species occur annually in winter. Distribution codes indicate species which are typically found in a limited range in the Yukon.

FREQUENCY and DISTRIBUTION CODES

R Rare: annual in low numbers or very localized.
CA Casual: at least 2 records but not every year.
AC Accidental: recorded only once.
W Winter: observed annually in winter.
***** **Confirmed Breeding:** Observations of an active nest or dependent, flightless young.

NS North Slope: northern foothills of the British Mountains, Coastal Plain, and Beaufort Sea.

S South: south of 63° N (includes Pelly Crossing but not Stewart Crossing).

SE Southeast: southern Yukon east of 131° W (Swift River); italicized (**SE**) for species restricted to the La Biche and Beaver river valleys in the extreme southeast Yukon.

DOCUMENTING BIRD SIGHTINGS

Contribute to our knowledge of the Yukon's birdlife by sending written or photo documentation of rare, casual, or accidental species or those not on the checklist, and details of breeding observations to:
